

**“We care about our future;
and therefore, we provide support to forestations
projects every year”.**

The wooden parts which are used for all of our products
are made of sustainable, industrial certified trees.

Production

Why Atro Pilates?

Atro Pilates was launched to create equipment that is both safe and aesthetically pleasing by drawing on sports biomechanics and kinesiology and determined the fields of use of its equipment accordingly. Equipment has been designed so that they can be used in studios, physiotherapy centers and at home.

Atro Pilates uses high quality, environment-friendly and sustainable industrial materials. Our entire equipment is secured under a patent and rigorously manufactured in our own factory by use of first-class material and taking hygiene and natural production processes into consideration.

Atro Pilates equipment that offers quality, ergonomics and comfort together meets your needs smoothly.

Atro Pilates products which are made in the UK are manufactured in its manufacturing facility in London by drawing on specific designs and engineering.

It manufactures quality equipment for consumers of Atro Pilates for more than 15 years by investing in material engineering and Research and Development. It combines its knowledge gained through its experience of manufacturing more than 10.000 reformers with innovations in the sector and, as such, designs innovative, models in addition to conventional pilates equipment.

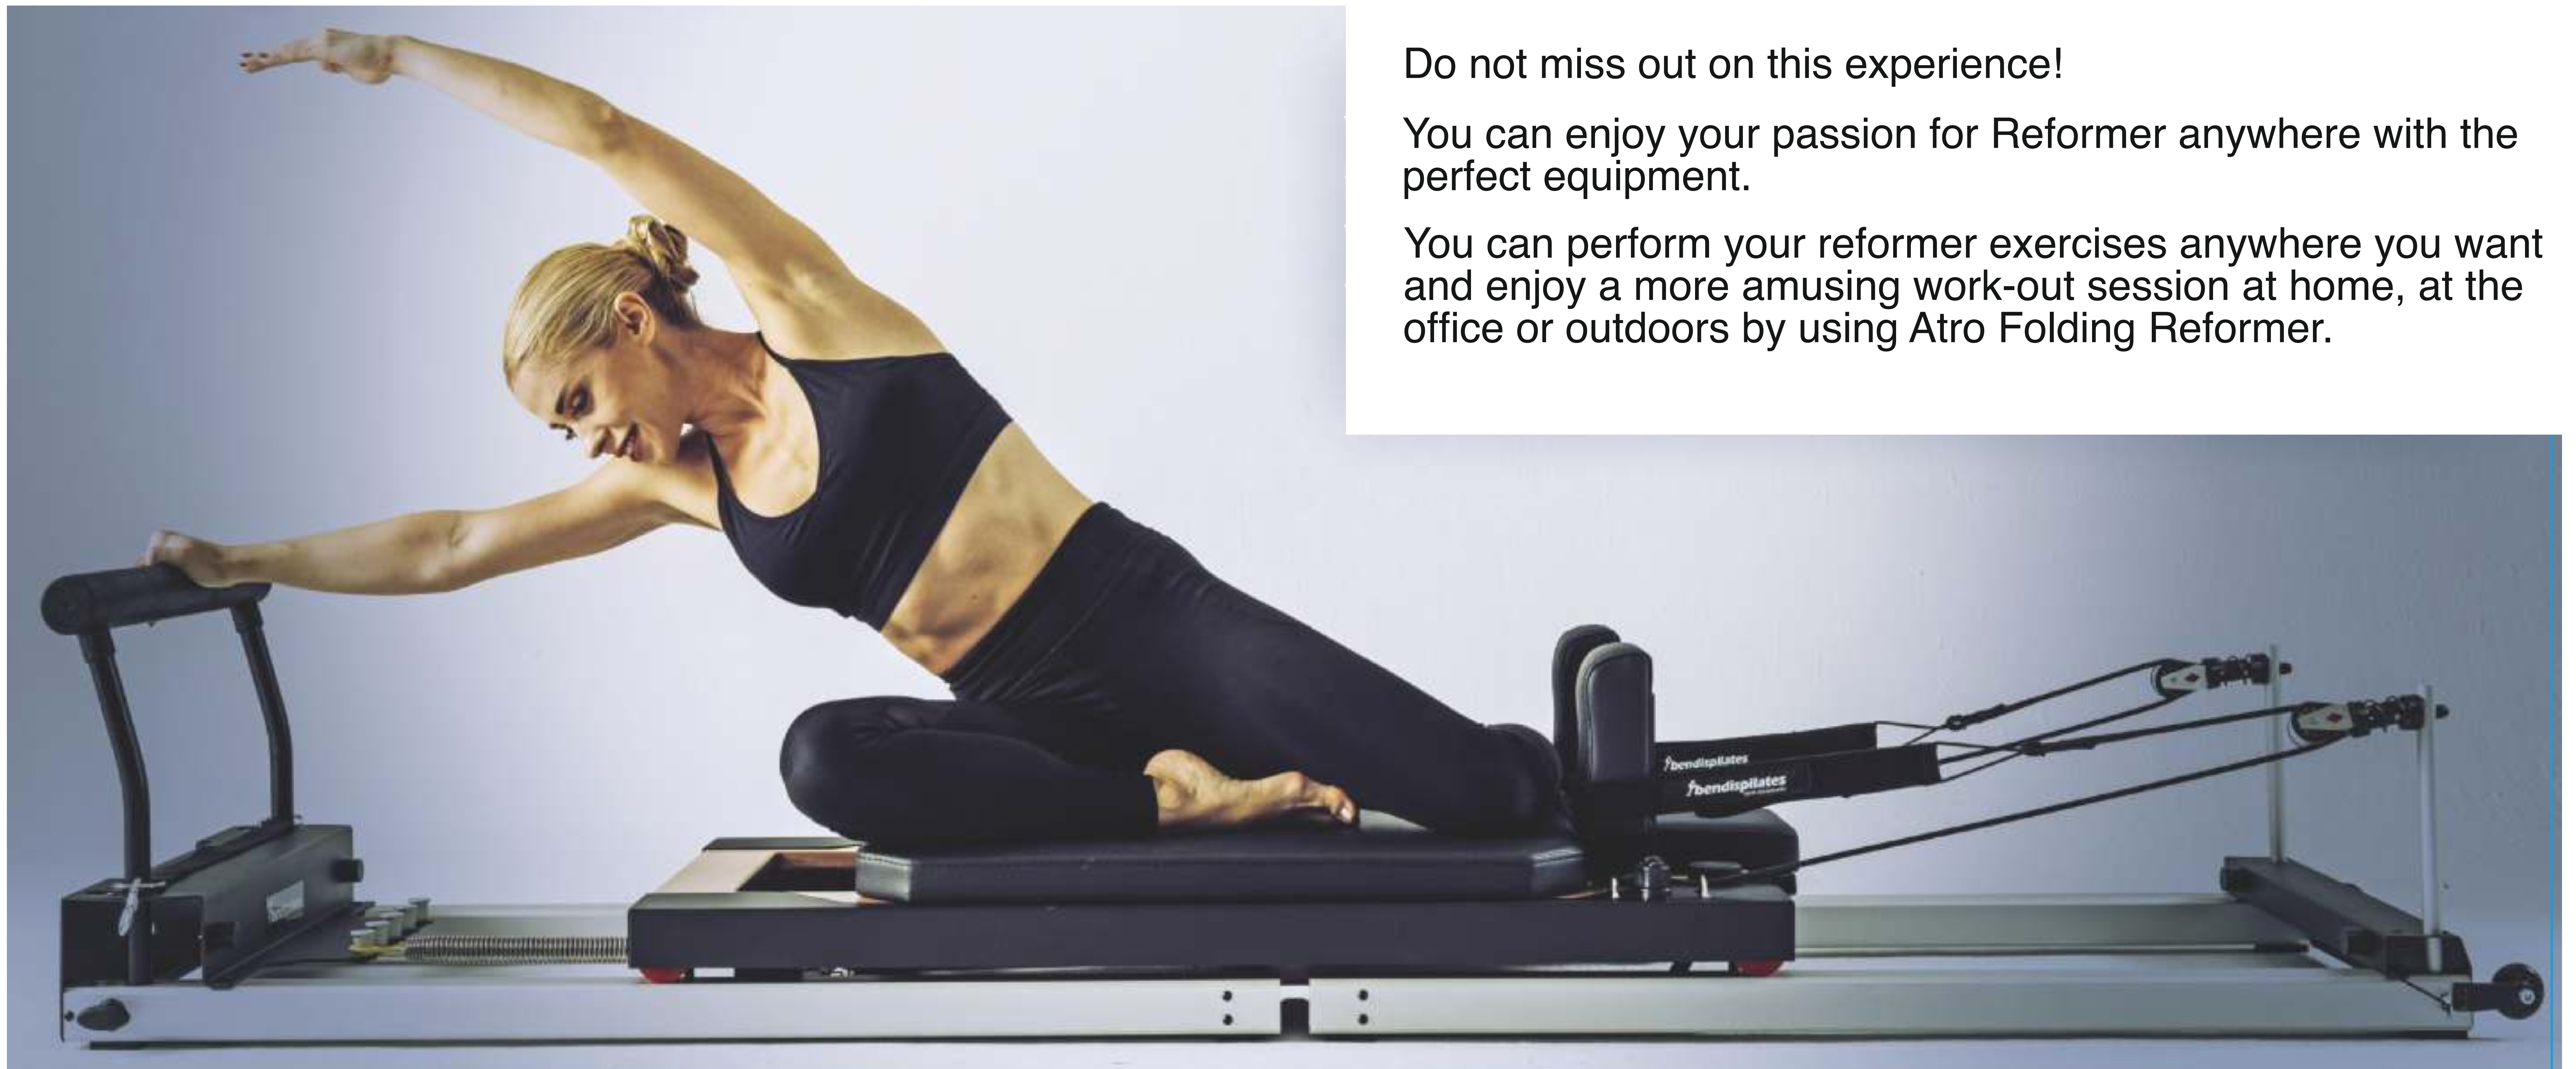

Atro Pilates stands out as it exports its products to many countries all over the world besides being a leading brand in Great Britain.

Atro Pilates adopts it as a principle to manufacture sturdy, foreseeable and smoothy-operating products through engineering, which are also aesthetic and easy to use thanks to its design.

Continuity and accessibility in service is the clear answer of why Atro Pilates it is.

Folding Reformer

Atro folding reformer is one of the most practical pieces of reformer equipment that can be used for group lessons in pilates studios besides being a home equipment.

Do not miss out on this experience!

You can enjoy your passion for Reformer anywhere with the perfect equipment.

You can perform your reformer exercises anywhere you want and enjoy a more amusing work-out session at home, at the office or outdoors by using Atro Folding Reformer.

Dimensions

Length in open position: 243 cm

Length in folded position: 135 cm

Width: 62 cm

Weight: 45 kg

Features

- Folding Reformer has been designed so that it can be folded. When you move the equipment upwards to fold, its weight feels 15 kg rather than 45 kg. When it is in closed position, you can either let it stand, lean it against the wall or leave it on the floor.
- Its main bed is made of aluminum so that it can be carried easily and it lasts long.
- It is easily folded and unfolded at once by using the folding handle under the reformer head piece.
- Equipment upholstery is made of first class, antibacterial leather.
- Head and shoulder parts are designed in a way to be adjusted to ensure cervical convenience and right posture.
- Long rope and moveable reel that reduces friction enables joint angles to stay the same during movements.
- Foot bar can be used at 4 different levels.
- All of the equipment springs are made of first class steel.
- 5 springs are used for the carriage (yellow, blue, green, red and black).
- Equipment does not slip on the floor thanks to the plastic covers placed under its legs.

Accessories

All of the accessories are manufactured rigorously in our own factory by taking natural manufacturing processes into consideration.

BOX

This accessory, which is also known as Pilates Box and Sitting Box, is an accessory that is used together with Reformer and Cadillac Reformer equipment.

FUZZY

It is known as fluffy foot strap in pilates exercises. It is one of the indispensable accessories of Cadillac and Cadillac Reformer equipment. Its supportive fur is advantageous in the sense that it ensures high safety during balance movements.

JUMP BOARD

This accessory, which is also known as Padded Jumpboard, will add a wide range of new exercised to your Pilates repertoire on Reformer, Folding Reformer and Cadillac Reformer equipment. It is the apparatus that is combined with cardio exercises for advanced users.

HANDLES

This pilates handle ensures that you finish the movements conveniently and comfortably during your exercises thanks to its rubber handle.

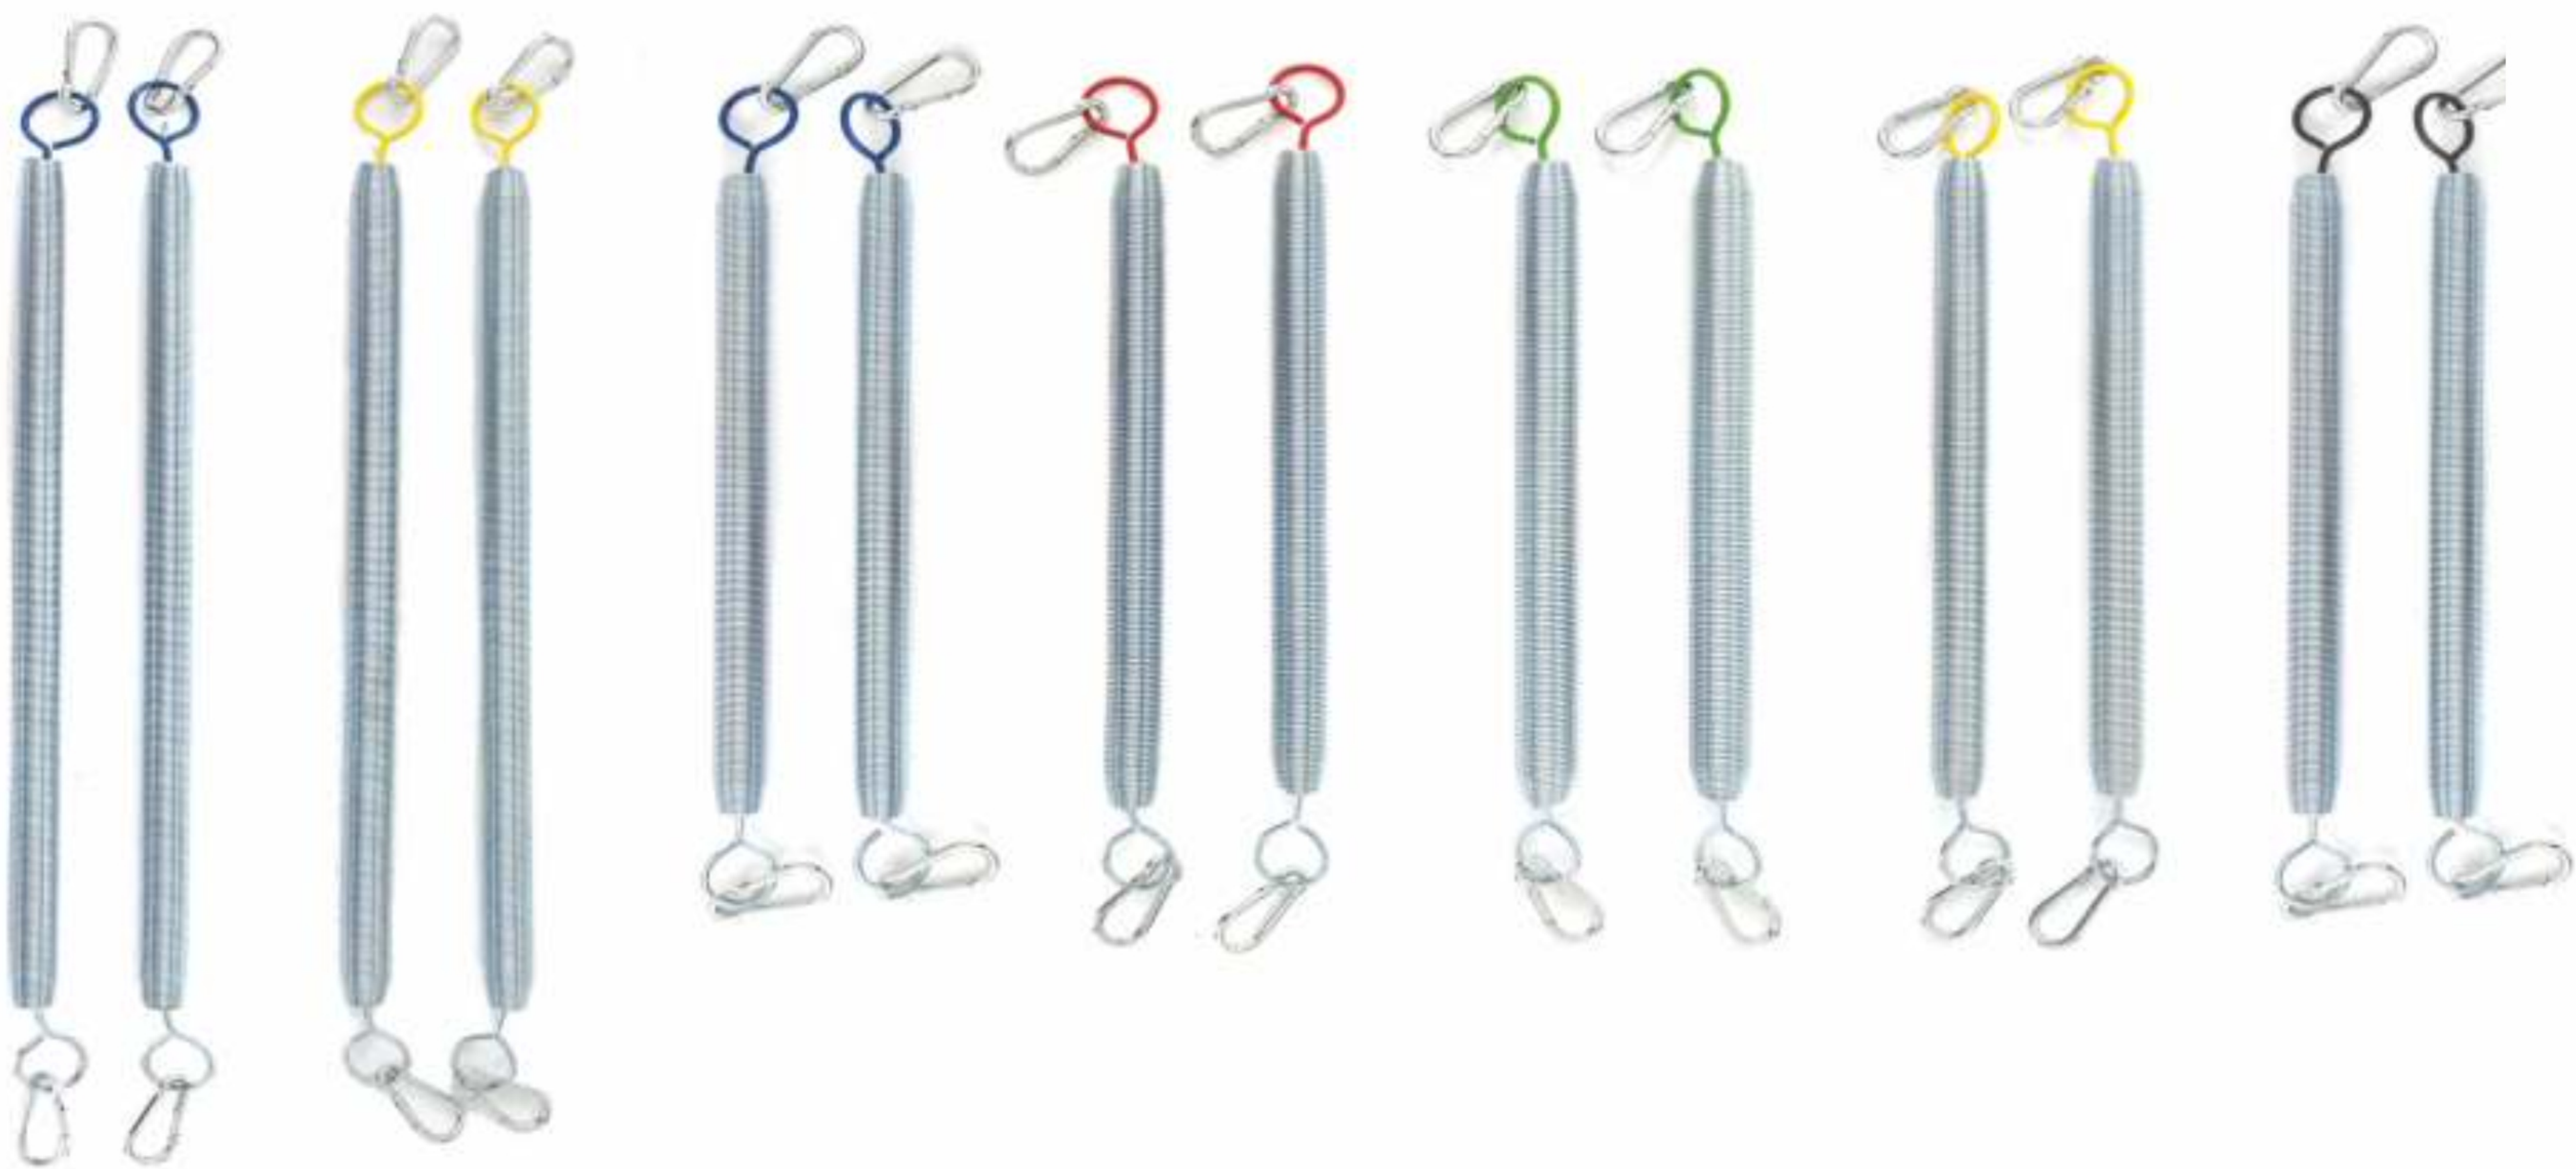

BDS REEL

This newly developed reel system enables movement of rope inside the reel so that maximum silence is ensured during circular movements.

SPRING SET

Spring systems which are of different resistances enables each user to do exercises against different resistances at every move thanks to its series of 10 springs which are long or short.

STRAPS

Straps which are attached to springs and ropes enhance hand and feet comfort due to their cotton texture.

WOODEN BAR

This accessory, which is attached to springs, is one of the most used apparatus of Cadillac equipment.

TRAPEZE

Trapeze bar which is made of hard beech tree and the special sponge if which is coated with non-slip leather enables ease of movement.
